INSTALLATION

INSTALLATION

Installation Requirements

02 INSTALLATION

Installation Requirements

The hardware, software and internet connection of the computer are all critical to ensure an optimal BUDS3 performance.

BRP may not be able to assist if the computer configuration doesn't match the minimum requirements.

Specification	Recommended	Minimum
Processor type	64-bit	Quad-core
Available disk space	35 GB SSD	35 GB HDD
Operating system	Windows 11 64-bit	Windows 10/11 MacOS not supported
RAM	8 GB	4 GB (if there is no excessive memory usage by other applications)
Screen resolution	1920 x 1024	1366 x 768

BRP recommends using the computer for BUDS3, BossWeb and other BRP usages only. Diagnostic tools from other powersport vendors, some computer security suites and some remote administration software could occasionally interfere with the correct operation of BUDS3.

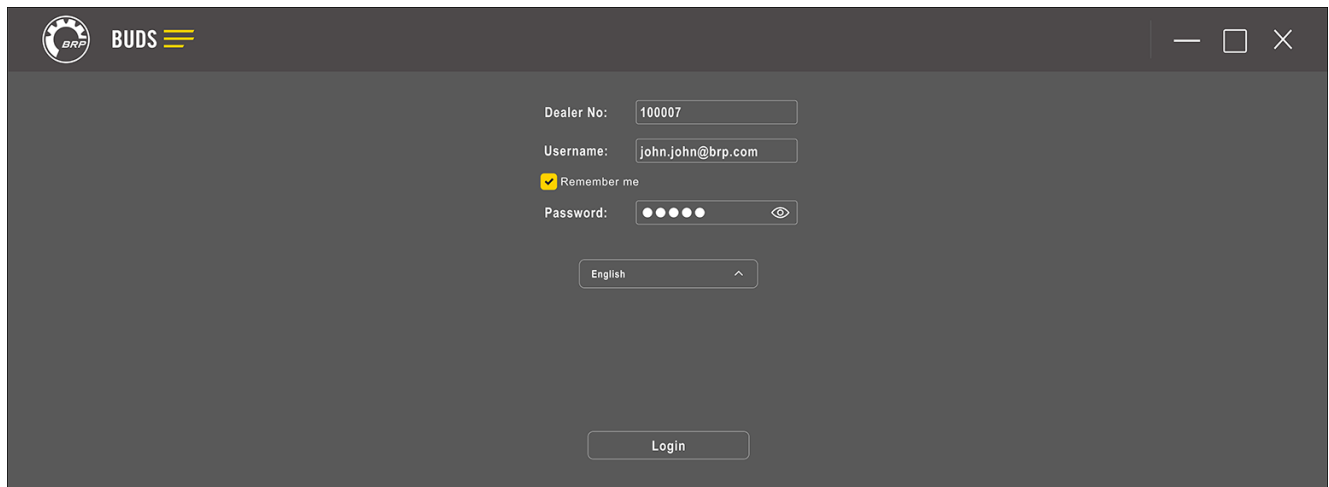

Windows administrator privileges are required for BUDS3 installation and regular update, as well as for module update operations using a USB-to-USB cable connection.

Installation Process

1. Execute the installation program called **BUDS3_Setup.exe**.

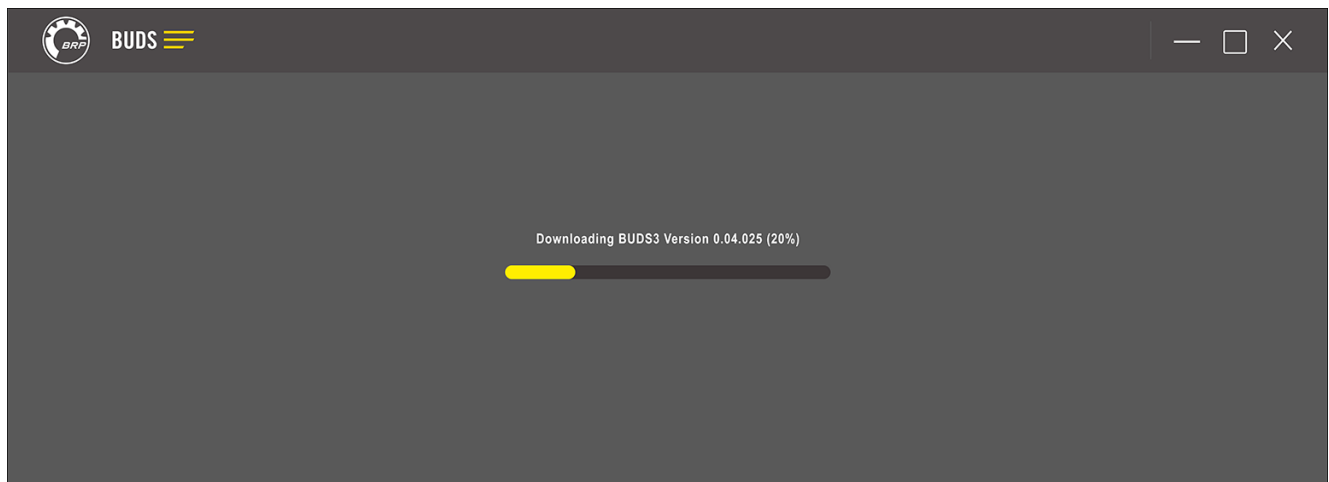

NOTE: If not logged-in as Windows administrator, please run the installation program as Windows administrator. To do this, right-click on the installer and click on **Run as administrator**.

2. If Windows opens a security warning, accept it by clicking on **Run**.
3. If you want to cancel the installation process, press the **Cancel** button or the **X** on the top right of the window at any point of the installation.
4. The setup installs the following components on the computer:
 - D-Server
 - OTX-Runtime
 - TDX.framework
 - TDX.bootloader
 - Softing PDU-API for the V800 VCI
 - Samtec PDU-API for the V1k VCI
 - Kvaser USB drivers for the V800
5. Log into the bootloader.

FIRST USER AUTHENTICATION ON THE TDX BOOTLOADER

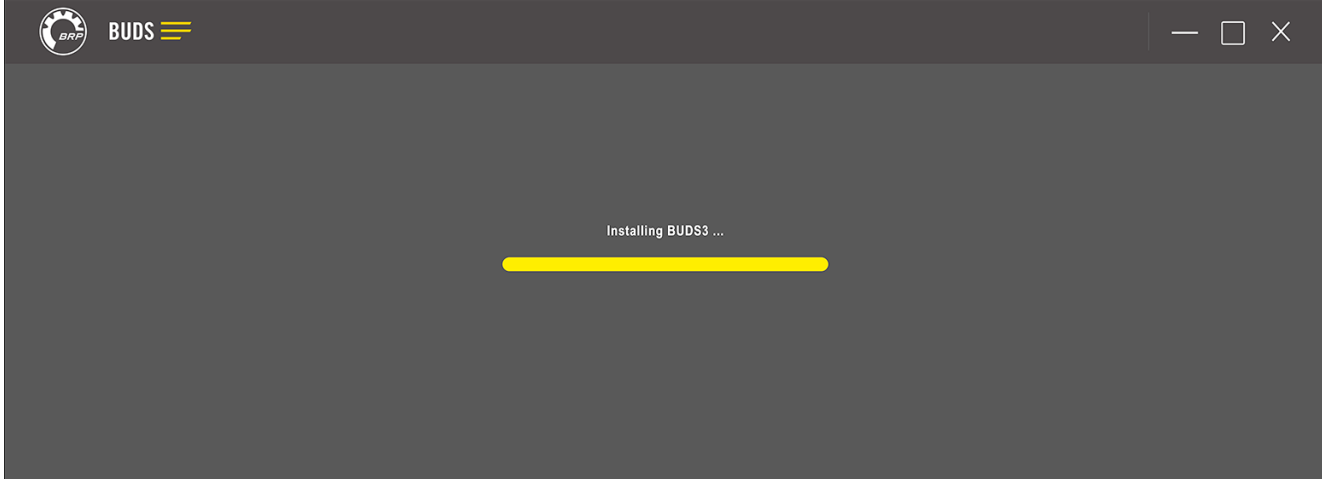

6. After successfully logging in, the content version will be downloaded.
